DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 18 to 20 and 22, drawn to a device manufacturing method, classified in class 438, subclass 7.
 - II. Claims 1 to 17 and 21 and 23-24, drawn to an exposure apparatus for printing, by exposure, a pattern of an original on a substrate, classified in class 364, subclass 550+.
2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used by the process of an endpoint detection system which determines locations of layers on a semiconductor wafer or device for planarization.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
